The sufficiency of these procedures is solely the responsibility of the Specified Parties. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

Unless otherwise indicated, the following definitions have been adopted in presenting our procedures and findings:

- The term "compared" means compared to the information shown and found it to be in agreement, unless otherwise noted. Such compared information was deemed to be in agreement if differences were attributable to rounding.
- The term "recomputed" means recalculated and compared the result to the information shown and found it to be in agreement, unless otherwise noted. Such recomputed information was deemed to be in agreement if differences were attributable to rounding.

The Company is responsible for the specified attributes identified by the Company in the Data Files.

I. The Units File

- A. The Company instructed us to select a random sample of 40 Containers (the "Sample Containers") from the Units File that the Company indicated were to be included in the preliminary structure of the Transaction. A listing of the Sample Containers is attached hereto as Exhibit B.
- B. For each Sample Container, we compared or recomputed the information in the Units File to or using the information stated in the sources provided by the Company indicated below (the "Sources"). The Specified Parties indicated that the absence of any of the noted Sources or the inability to agree the indicated information from the Units File to the Source(s) for each of the attributes identified constituted an exception.
